Fraction word problem

There are 20 students in the class. There are 12 girls in the class. 15 of the students wear glasses.

1. What fraction of the students wear glasses?

2. What fraction of the students are boys?

3. If $\frac{4}{15}$ of the students wearing glasses are boys and $\frac{11}{15}$ of the students wearing glasses are girls, are there more boys or more girls wearing glasses?
