

Addition of three or more numbers

Sam is the manager of a bakery.

1. There are 4 staff working at the counter and 12 staff in the kitchen. Also, there are 2 staff delivering orders. How many staff are working at the bakery today?
2. There are 4 counters open during the morning. The first counter sold 7 muffins. The second counter sold 5 muffins. The third counter sold 14 muffins. The last counter sold 9 muffins. How many muffins were sold in total?
3. The price for a sandwich is \$6. The price for a tea is \$2 and the price for an apple juice is \$3. A customer orders one sandwich and two teas. How much does he need to pay?
