

Identifying place value

Example: 53 = 5 tens

Determine the place value of the underlined digit

$$\underline{8} = \underline{\hspace{2cm}}$$

$$4\underline{8} = \underline{\hspace{2cm}}$$

$$\underline{3}5 = \underline{\hspace{2cm}}$$

$$\underline{5} = \underline{\hspace{2cm}}$$

$$\underline{9}2 = \underline{\hspace{2cm}}$$

$$\underline{1}9 = \underline{\hspace{2cm}}$$

$$\underline{2} = \underline{\hspace{2cm}}$$

$$5\underline{0} = \underline{\hspace{2cm}}$$

$$\underline{6}7 = \underline{\hspace{2cm}}$$

$$\underline{9} = \underline{\hspace{2cm}}$$

$$1\underline{0} = \underline{\hspace{2cm}}$$

$$\underline{2}6 = \underline{\hspace{2cm}}$$

$$8\underline{4} = \underline{\hspace{2cm}}$$

$$6\underline{3} = \underline{\hspace{2cm}}$$

$$\underline{7}1 = \underline{\hspace{2cm}}$$

$$\underline{8}8 = \underline{\hspace{2cm}}$$
