

Inherited traits

Living things

Every living thing gets traits from its parents.

A puppy gets its fur pattern and eye color from its parent dogs.

A adult apple tree passes its flower color and fruit taste down to its young saplings.

Write two physical features a baby animal can inherit from its parents.

Write two features a young plant can receive from its parent plant.

Write three personal characteristics you inherited from your mother or father.

Explain what it means when a living thing inherits a trait.
