

Mixed addition and subtraction problems

Noah was helping his PE teacher, Mr. Clark, to clean up the storeroom for sports equipment.

1. There were 22 basketballs and 38 soccer balls. How many more soccer balls are there than basketballs?
2. Noah found 9 volleyballs in the storeroom. Mr. Clark said there should be a total of 15 volleyballs. How many volleyballs were missing?
3. There were 8 tennis balls in a basket and Noah found 7 more tennis balls on the floor. Then, a student borrowed 6 tennis balls. How many tennis balls were left in the storeroom?
