

Subtraction word problem

Subtraction

The post office was having a busy time as everyone was sending out presents and cards to their loved ones before the holidays

1. Before the post office opened on Monday morning, there were 90 boxes of envelopes. At the end of the day, there were 42 boxes left. How many boxes of envelopes were sold on Monday?

2. On Tuesday, 94 letters and 85 large packages were received. In the morning, a mail truck took away 32 packages. In the afternoon, the mail truck took away another 28 packages. How many large packages are left in the post office?

3. On Wednesday, 52 packages were brought in for delivery. 12 of the packages were marked express and 9 of the packages required a signature. How many packages did NOT require a signature?
